

CRASHTEST SECURITY

TypeScript/JavaScript Developer (f/m)

You are an enthusiastic **TypeScript/JavaScript Developer (f/m)** who wants to shape the future of web application security testing? Then You are the perfect candidate to join our team!

Crashtest Security is a young, Munich-based startup, which was founded in 2017. We offer an automated penetration test for web applications which integrates into the agile development environment. Our goal is to make automated penetration tests available and usable for every web developer and every application.

Your Qualifications...

- Experience in developing web applications using TypeScript / JavaScript with AngularJS 5 (or newer)
- Capability to design and implement intuitive user interfaces by using mock-ups and other usability / user experience design methods
- Solid software engineering skills in an agile environment
- Self-motivated, organized and driven to succeed with an entrepreneurial spirit
- Work smart mentality
- Excellent written and oral communications skills in English, German is a plus
- Experience with Material Design for AngularJS, Node.js and web crawling is beneficial

Your Responsibilities...

- Implement new features for the frontend of our vulnerability scanner such as a team management functionality
- Collaborate closely with our backend developers to integrate the functionality provided by our REST API
- Create a crawler for Single Page Applications as part of our scanning engine based on Node.js
- Maintain and run your code in the Google Cloud as part of our DevOps team

What we offer...

- A cutting-edge agile software development pipeline: Continuous Integration and Deployment to regularly release new versions (JIRA, Bitbucket, Google Cloud Build, etc.)
- The startup experience: Freedom to take responsibility, flexibility in the organisation of your work hours and area of responsibility and a curious and helpful team
- We know that developers turn coffee into code, so we have you covered with a supply of coffee, spezi and beer at our office!
- Opportunity to shape the future of secure software development
